A three months Internship powered by UK-Ng techhub, powered by Decagon, I was assigned to Crowdforce as a frontEnd Software Engineer, where I worked on the frontEnd of one of their major Applications.

Genesys Tech Hub Enugu/ Web Developer Intern (FrontEnd Reactjs)

June 2020 - February 2020 Enugu, Enugu State, Nigeria

Learnable is a product development and leadership training program for young people that are interested in building a career in the software development industry. The program is designed to equip entry-level techies with the skills required for a successful career in technology. The program covers software development and product design. It also focuses on helping participants acquire soft skills such as effective communication, research, marketing, etc. Being at Genesys pushed me beyond my bounds that, when I look back at all I have been able to achieve, I smile with zero regrets.
